DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. Figures 1A-1E and 2 should be designated by a legend such as --Prior Art--because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Art Unit: 2611

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract is too long and should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words.

- 4. The disclosure is objected to because of the following informalities: at page 21, both line 3 and line 10, "unit of" should be, "unit 41 of"; at page 21, line 22, "and a" should be "and an"; and at page 28, line 21, "the acquisition unit 46" should be "the DSP 463". Appropriate correction is required.
- 5. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

6. Claims 4-6 are objected to because of the following informalities: in claim 4, line 17, "of the said oscillator" should be "of said oscillator". The dependent claims 5 and 6 are objected to because they are depended upon the independent claim 4. Appropriate correction is required.

Application/Control Number: 10/784,502

Art Unit: 2611

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, the term "said acquisition unit perform the search processing at the frequency before the frequency change after the frequency change of said oscillator" is not understood. Also see claim 5.

In claim 3 (lines 2 and 7) and claim 6 (lines 2, 5-6 and 7-8" the terms "the frequency", "the synchronization holding processing", and "said frequency" all lack antecedent basis.

In claim 4, lines 1-2, the term "according to a second aspect of the present invention" is not understood.

Allowable Subject Matter

- 9. Claim 1 is allowed.
- 10. Claims 2-6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 2611

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ariyoshi et al. relates to a communication system using CDMA and a control method of tracking the phases of spreading codes.

Kontola et al. relates to a method and apparatus for acquisition of a transmitted code-modulated spread spectrum signal, generating at least one reference code corresponding to the code used in the modulation, and for determining the frequency shift of the transmitted signal and the code phase of the code used in the modulation.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to YOUNG T. TSE whose telephone number is (571) 272-3051. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on (571) 272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
